

# AKUA AKUATrack

## AKUATrack Cargo Tracking & Monitoring Software

AKUATrack is a continuous in-transit visibility and analytics Software-as-a-Service (SaaS) platform that tracks and monitors the location of your cargo. Accessed via any desktop or mobile browser, AKUATrack's single-platform solution provides 24-7, end-to-end in-transit visibility across complex supply chains and provides actionable data in real time enabling users to enhance operating effectiveness and efficiency; minimize loss from theft, damage, or other spoilage; and optimize the value of goods.

The AKUATrack service delivers location, security and sensor data and presents it in user-friendly, easy to understand maps, graphs, tables, and reports. AKUATrack users can opt-in to receive alerts in the event of breach detection, geofence ingress and egress, and/or sensor thresh-old exceptions.

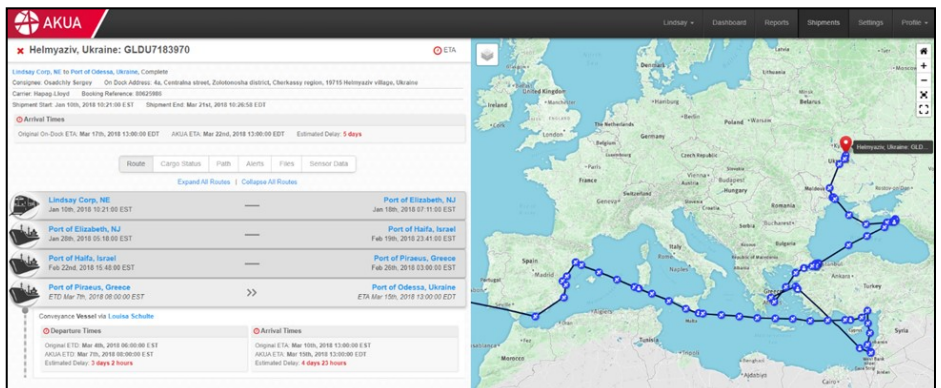

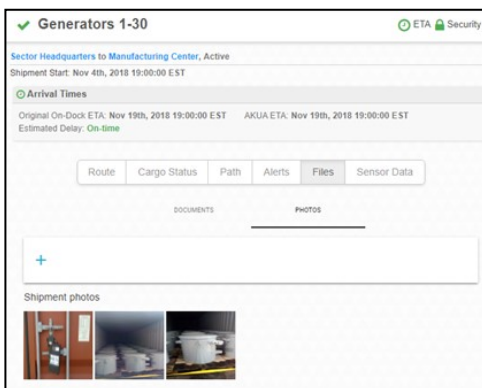

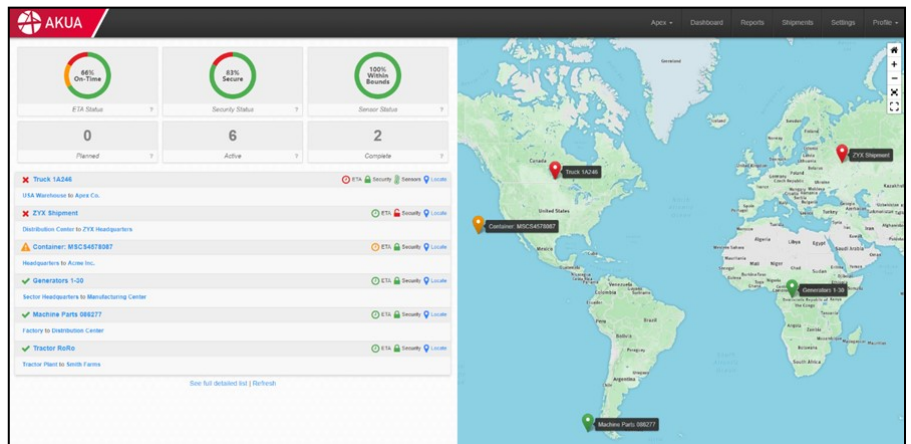

### Dashboard

The AKUATrack Dashboard delivers an instant, at-a-glance snapshot of your active shipments around the world and their current status, including location, security, temperature and humidity, and Estimated Time of Arrival.

### Shipments

AKUATrack offers users one, consolidated location for all your shipment information. The AKUATrack Shipment view enables users to have a shipment's detailed status and the most up to date information at your desk or on the go. In addition, cargo photos and documents can be uploaded to a single repository for your shipment. Features include:

- **Schedule and Routing Information:** Delays and dynamic Estimated Times of Departure and Arrival easily facilitate actionable scheduling delays and identification of recurring delay points.
- **Security and Sensor Alerts:** What, when, and where did alerts occur.
- **Shipment Information:** Consignee, carrier, and shipment identification numbers.
- **Add Photos:** A visual record of cargo integrity on load and on delivery. Available via AKUATrack or the AKUA Mobile Application.
- **Add Files:** Shipment documents available in an easy to access central location.

## Shipment Routing Information

AKUATrack shows detailed routing information to include arrival and departure estimates, ports, transshipment and transload locations, rail yards, on-dock address, and conveyance- be it rail, ocean, air, or road.

## In-Transit Location Updates

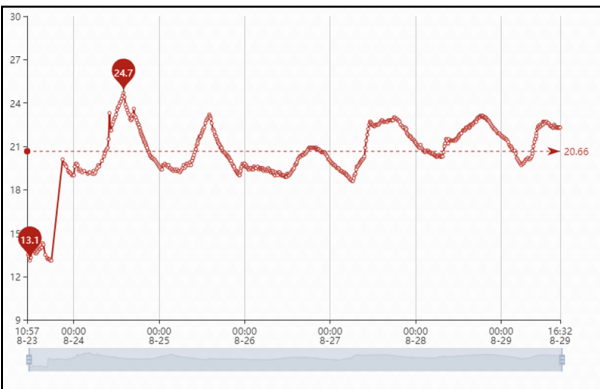

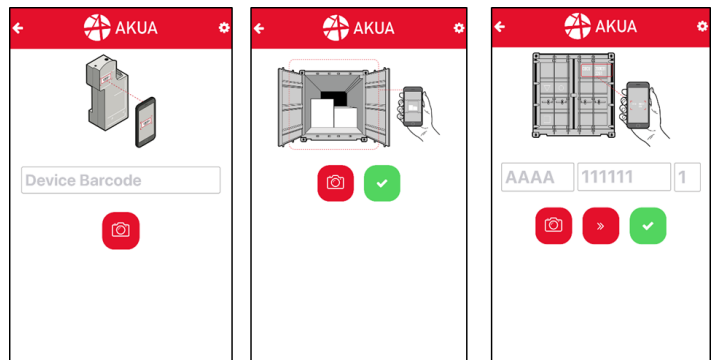

The AKUATrack platform enables users to visually locate shipments and assets at a glance. Locations can be pinpointed using geolocation complete with streets, nearby landmarks, ports, railways, and route points. The display can optionally show shipment routing, security events, and sensor events.

## AKUA Mobile Application

The AKUA Mobile Application, available for Android and Apple iOS, provides a seamless process to get shipment information from loading dock to AKUATrack, streamlining your cargo's tracking using AKUA's platform. While loading cargo, simply use the application to scan your device, take a photo of your cargo, and scan the container number or enter cargo identification to send directly to the AKUATrack platform to streamline your loading process in less than a minute.

## Sensors

AKUA has a comprehensive group of temperature, humidity, and shock sensors presenting real-time data viewable from the AKUATrack platform. Easily see your cargo's environmental status via the Sensor Data tab's graphing tool, enabling identification of when and where cargo was compromised.
